Optimax Windows Update Version 1.3.104

Important

Dial into the Optimax website (www.optimax.mhs.co.za) register to obtain your password (if you do not have one) and follow the instructions as per the screen.

You are granted the right to install the update on your own computer/computers subject to the limitations of the copy protection software. This update is for your practice only. You shall not permit any other person to use this update and Optimax does not hold itself responsible for any software corruption if used by an illegal user.

Instructions

Where more than one Computer is used, as part of a Network in the practice, please ensure that the update is done on the server. The server and all the other workstations must be logged out of Optimax. Failure to follow this instruction will result in very serious data problems occurring.
