## **Latest News**

*Please note – Optimax Windows Updates are available via the Optimax website ( [www.optimax.mhs.co.za](http://www.optimax.mhs.co.za) ) – register today. If you do not have Internet see our special offer.*

### **Optimax Windows Update Version 1.3.129**

Where more than one Computer is used, as part of a Network in the practice, please ensure that the update is done on the server. The server and all the other workstations must be logged out of Optimax. Failure to follow this instruction will result in very serious data problems occurring.

You are granted the right to install the update on your own computer/computers subject to the limitations of the copy protection software. This update is for your practice only. You shall not permit any other person to use this update and Optimax does not hold itself responsible for any software corruption if used by an illegal user.

#### **This update contains :**

- April Price Update – new products & price changes ( please run on the 1<sup>st</sup> April )
- Transmed codes for Single Vision to reflect 93200 and Bifocal 93300
- Attachments now allowed in Clinical Module
- Lab orders via e-mail now same sequence as the hard copy
- Multiple same day entries on the clinical module
- Display PD's on Contact Lens tab in the Clinical module
- External Reference number for Dependents
- Wording on ID photo to disappear when selecting a photo
- Tab order sequence changed when amending stock
- Wordmax can now email wordmax letters as an attachment via the Email option
- Contact Lenses now reflect as "Contact Lenses" on the lab order
- Introduction of Notes on the Clinical Information Tab
- Tray labels to print on laser labels

From previous experience we know that medical aid changes are ongoing. In order to receive these changes within hours of us releasing them we urge you to obtain Internet access to our website. This will then allow you to download the files as and when they become available.
